

Maths

Children will be using all the skills they have learnt this year with the help of calculators as this skill will be needed when they start secondary school.

Art and DT

Children will be designing and creating moving toys. They will plan and evaluate their design and select appropriate materials in order to make it work.

RE

Children will be learning about the people of God.

They will be thinking about the following question, 'How can following God bring freedom and justice?'

Topic

Children will be learning how to start, manage and evaluate their own business. They will be working in small groups to create a business plan in which they will share with Mr Suleman (school business manager) to see if he will invest in their idea. Over two days the children will carry out their business and see which group can be the most successful.

English

We started the half term by looking back at our writing and editing pieces to ensure it made year 6 standards. Work will then be centered around our class text 'Holes'.

Science

Science continues from last half term where children will be learning all about inheritance and evolution. We will be looking at how the human body has evolved over time and which genes have been passed down through our families.

PE and Music

In Music this half term we will be learning the songs linked to our production Robin Hood and the Sherwood Hoodies.

In PE we will be learning how to play rounders.

TRIPS & EVENTS

24th –28th June STEM week
