

EY Resource

Listen to the children, who are telling us what they know about space and thinking about what else they would like to know. What do you already know about space? What else would you like to find out about space?

I know that people who go into space are called Astronauts and when they go into space, they have to wear a space suit.

I know there are lots of different planets in space and one of them is called Mars.

I know that people float around in space because there isn't any air.

I'd like to find out if there are any plants or animals living on any other planet.
