

## **Cloning potatoes**

As a follow up to your science experiment we have created a simple task to consolidate and deepen your understanding of the lesson.

Please make a video of yourself explaining what you did during your experiment, why you did it and what you think the results will be.

When you have completed the task please send your videos to [peter.collins@hstb.co.uk](mailto:peter.collins@hstb.co.uk) or (if the file is too large) you can send them to me via the following website [wetransfer.com](http://wetransfer.com)

Enjoy your filming!!
