

# Recognise tenths and hundredths

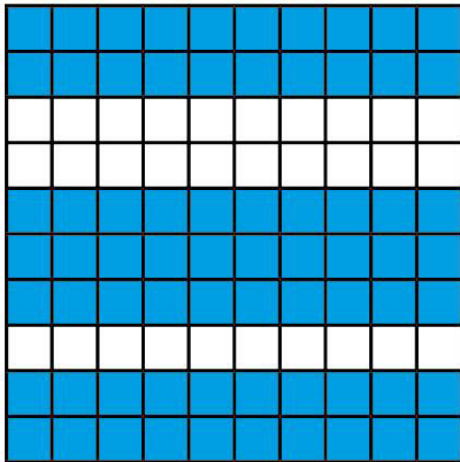

- I The hundred square represents 1 whole.

What fraction of each hundred square is shaded?

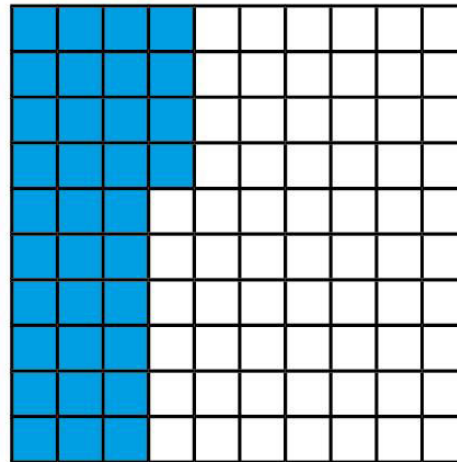

c)

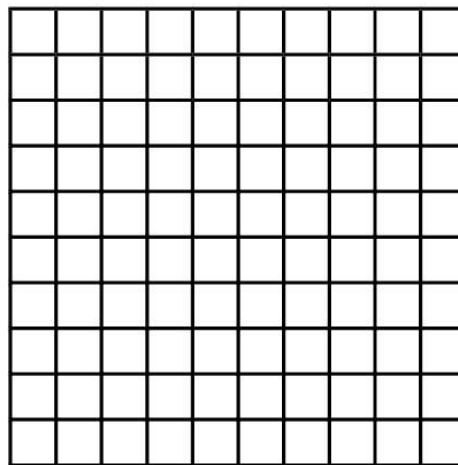

d)

2

Here is a hundred square.

What fraction of the whole does each represent?

a) 4 full rows =

d) 2 full rows and 5 squares =

b) 6 full columns =

e) 3 full columns and 8 squares =

c) 13 squares =

3 Complete the sentences.

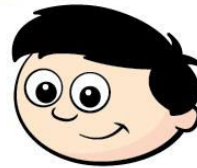

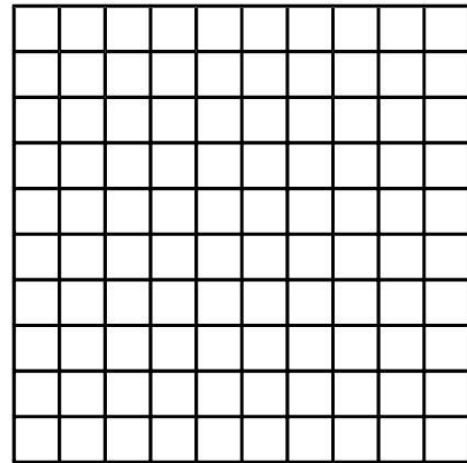

a) 4 tenths is equivalent to  hundredths.

b) 70 hundredths is equivalent to  tenths.

c) 5 tenths is equivalent to  hundredths or 1 \_\_\_\_\_

4

One row is one tenth and one column is one tenth, so if I colour one row and one column on my hundred square I will have shown 2 tenths.

Is Dexter correct? \_\_\_\_\_

Explain your answer.

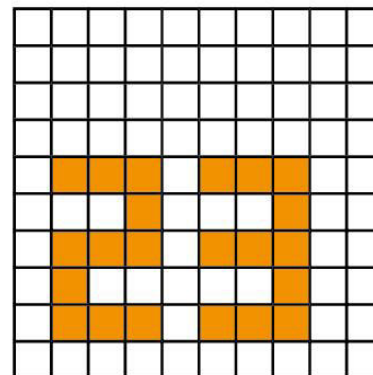

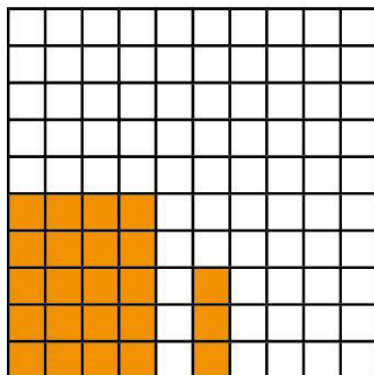

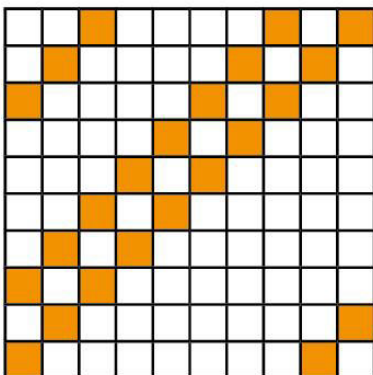

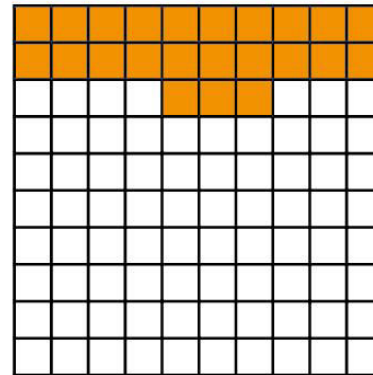

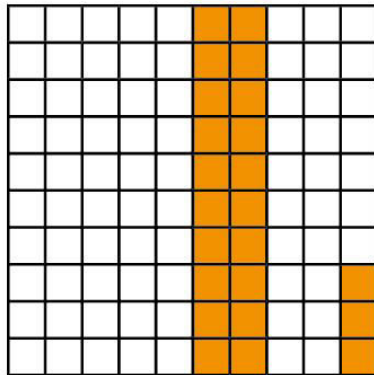

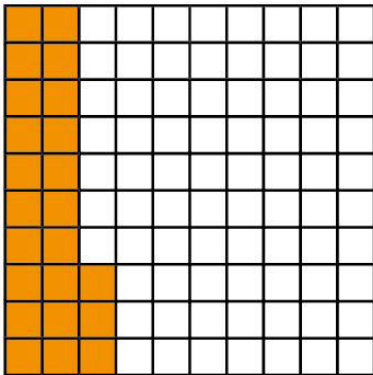

You may use the hundred square to help you.

---

---

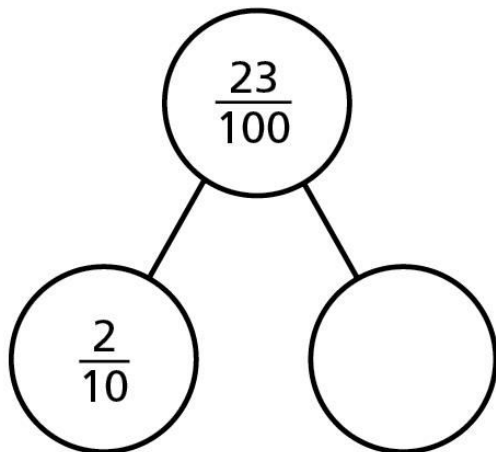

5 Tick the hundred squares with  $\frac{23}{100}$  shaded.

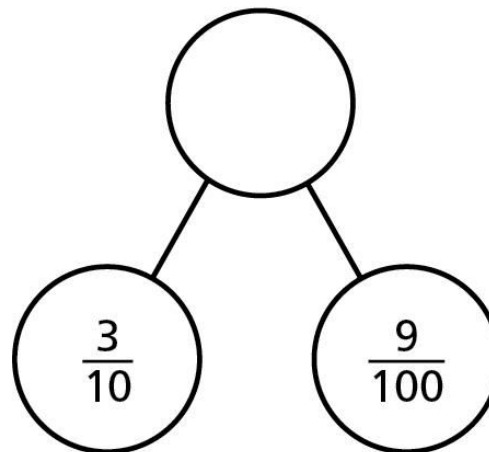

6 Complete the part-whole models.

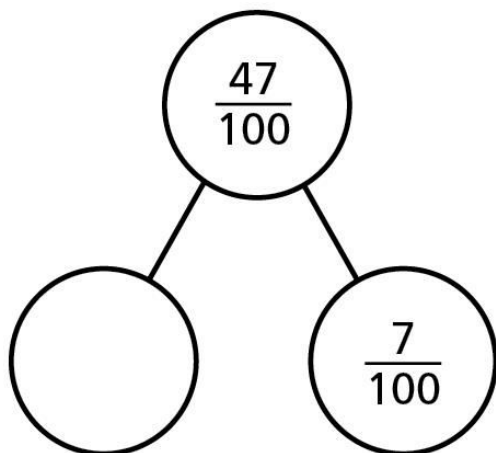

a)

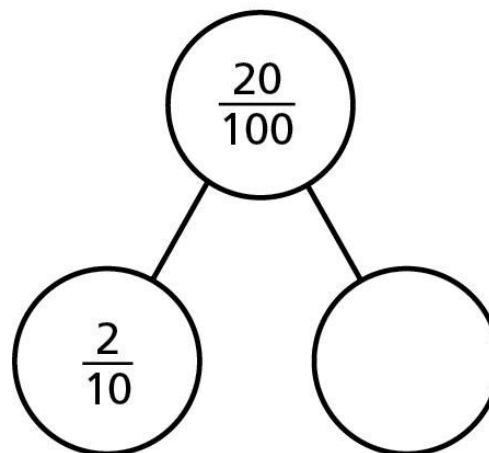

c)

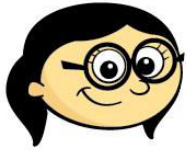

b)

d)

7

Annie

$$\frac{73}{100} = \frac{7}{10} + \frac{3}{100}$$

$$\frac{73}{100} = \frac{6}{10} + \frac{13}{100}$$

Ron

Who is correct? \_\_\_\_\_

How many ways can you partition  $\frac{73}{100}$  ?
