

Are these story books or facts?

What should you find inside?

This week we are linking today's lesson to tomorrow's literacy...

I would like you to read the factfiles with an adult and find out what some of the key words mean...

Week 6 Reception guided reading - To go with Youtube Lesson Vocabulary to learn...Can you find out what they mean? Ask an adult, use google, use a dictionary (with help)

- hibernate
- carnivore
- herbivore
- crescent moon
- spectacled
- bamboo

- termites
- honeycomb
- nocturnal
- shaggy
- tropical
- rainforest
- rare
- endangered

**American Black Bear**

American black bears are usually black or brown. They eat mainly berries, nuts, grasses and insects. Most American black bears hibernate during the cold winter months. They are very good at climbing trees and swimming. They are usually shy and easily frightened. They can run up to 35 miles per hour. There's no just in a bear!

**Brown Bear**

Brown bears live in lots of different parts of the world. They live in mountains, forests and meadows. Brown bears have sharp claws. They can dig up roots and bear's feet are big and flat. They can swim very well. They are very strong. They can run up to 35 miles per hour. They can run up to 35 miles per hour. They can run up to 35 miles per hour.

**Giant Panda**

Pandas only live in China. They are very good at climbing trees. There are only about 1,000 pandas living in the world. That is because people are cutting down the forests where they live. Pandas eat mainly bamboo. They have to eat lots of it every day. Pandas have special genes that help them hold onto the bamboo.

**Sloth Bear**

The sloth bear can live on its back. Sloth bears will eat just and flowers but their favourite food are termites, which they suck up like a vacuum cleaner. Some people call them honey bear because they think they eat honey. Sloth bears have very sharp teeth. The sloth bear is endangered.

**Sun Bear**

The sun bear is the smallest type of bear. They have a golden mark on their chests. Sun bears like to eat insects, small birds, small animals, insects and honey. They have a long tongue which is useful for sticking things out of holes. Sun bears don't need to hibernate because they live in warm places. Sun bears live in the tropical mountains of Asia.
