

ADD FRACTIONS

GET READY

1) 2 apples + 4 apples = _____ apples

2 ones + 4 ones = _____ ones

2 thousands + 4 thousands = _____

£2 + £4 = _____

2) What fraction is shown?

3) Show $\frac{3}{7}$ on a bar model.

1) 2 apples + 4 apples = 6 apples

2 ones + 4 ones = 6 ones

2 thousands + 4 thousands = 6 thousands

£2 + £4 = £6

$\frac{4}{5}$

2) What fraction is shown?

3) Show $\frac{3}{7}$ on a bar model.

LET'S LEARN

$$\frac{1}{7} + \frac{2}{7} = \frac{3}{7}$$

one seventh + two sevenths = three sevenths

$$\frac{2}{7} + \frac{4}{7} =$$

$$2 + 4 = 6$$

$$7 + 7 = 14$$

So the answer is $\frac{6}{14}$

Do you agree with Tiny?

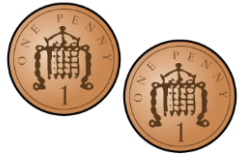

Have a think

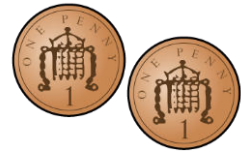

$$\frac{2}{7} + \frac{4}{7} = \frac{6}{7}$$

$2 + 4 = 6$
 $7 + 7 = 14$
Oh wait! I see now it's $\frac{66}{14}$

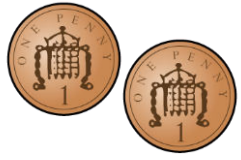

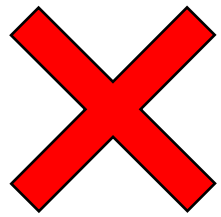

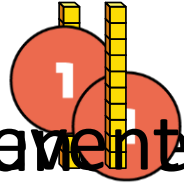

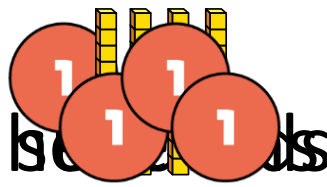

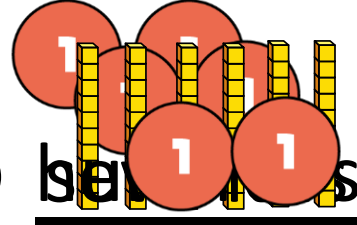

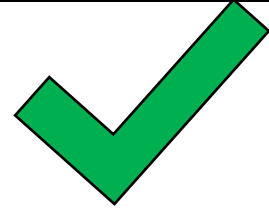

2  + 4  = 6 

A red X is drawn over the result, indicating it is incorrect.

2  + 4  = 6 

A green checkmark is drawn over the result, indicating it is correct.

2  + 4  = 6  

2  + 4  = 6  

$$\frac{2}{7} + \frac{4}{7} = \frac{6}{7}$$

$$\frac{2}{9} + \frac{4}{9} = \frac{6}{9}$$

Have a think 

$$\frac{1}{7} + \frac{2}{7} = \frac{3}{7}$$

$$\frac{2}{7} + \frac{4}{7} = \frac{6}{7}$$

$$\frac{2}{9} + \frac{4}{9} = \frac{6}{9}$$

What do you notice?

Have a think

Add the numerators

Keep the denominators
the same

YOUR TURN

Have a go at questions
1 – 3 on the worksheet

$$\frac{\square}{9} + \frac{\square}{9} = \frac{\square}{9}$$

You can use each digit card once per solution.

How many solutions can you find?

$$\frac{1}{9} + \frac{2}{9} = \frac{3}{9}$$

$$\frac{1}{9} + \frac{3}{9} = \frac{4}{9}$$

Have a think = $\frac{4}{9} + \frac{5}{9} = \frac{9}{9}$

$$\frac{1}{9} + \frac{5}{9} = \frac{6}{9}$$

$$\frac{2}{9} + \frac{3}{9} = \frac{5}{9}$$

$$\frac{2}{9} + \frac{4}{9} = \frac{6}{9}$$
