

Date: 3.2.22					
Walt: Divide numbers and objects using the bar model into groups of 2, 5 or 10					
What I am looking for is that			SM	PM	TM
B	You can confidently count in multiples of 2, 5 and 10. You can say one more or one less of each.				
R	With support you can work as a group to share objects equally into groups of 2, 5 or 10.				
Y	You can work with a partner to investigate which numbers can be divided equally into groups of 2, 5 and 10. Challenge: Do you notice any links?				
G	You can work independently to use the bar model to divide numbers up to 100 by 2, 5 or 10.
