

YEAR 2

Multiplication & Division

- Odd and even numbers
- Divide by 5
- Divide by 10

PrimaryStars
EDUCATION

Block 1 – Week 4

Monday Short Lesson 1

Step: Odd and even numbers

Put the numbers under the correct heading.

Odd		Even	
1	11	6	14
3	15	8	16
9	17	12	20

3 17 20 6 14 11
 16 8 15 9 12 1

Which numbers are even?

A cloud-shaped frame containing a grid of numbers. The numbers are arranged in four rows and five columns. The numbers are: 15, 1, 60, 19, 22; 40, 29, 50, 9, 5; 58, 25, 3, 10, 7; 55, 30, 87, 12, 11. The even numbers (60, 22, 40, 50, 10, 12, 30) are circled in red.

15	1	60	19	22
40	29	50	9	5
58	25	3	10	7
55	30	87	12	11

Are these numbers odd or even?

a) 23? odd

f) 54? even

b) 39? odd

g) 11? odd

c) 42? even

h) 28? even

d) 14? even

i) 13? odd

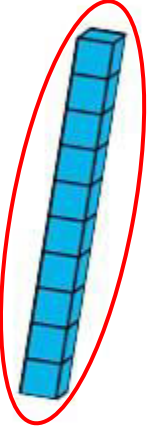

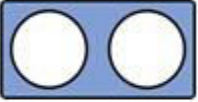

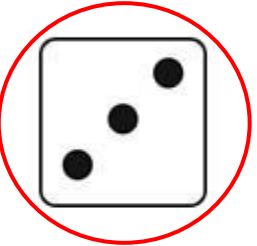

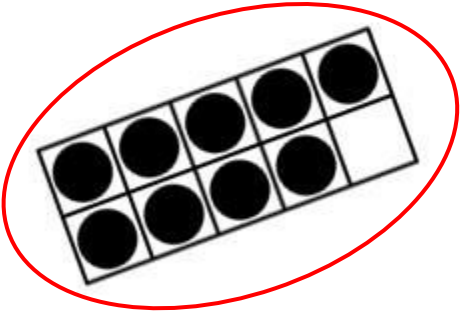

e) 27? odd

j) 36? even

Which number frames are odd?

Spot the mistakes.

Odd	Even
        	        

Jack has coloured 3 odd numbers yellow and 3 even numbers red. What mistake has Jack made?

36	28	17	11	3	44
10	26	5	8	13	29
15	9	48	39	37	50

Jack has coloured 44 yellow.

It should not be yellow as it not an odd number.

44 is an even number.

Kat says,

I am thinking of an odd
number between
16 and 28.

What could Kat's numbers be?

17, 19, 21, 23, 25, 27

Wednesday

Short

Lesson 2

Step: Divide by 5

How many groups of 5 can you make? **3 groups of 5**

How many groups of 5 can you make? **2 groups of 5**

How many groups of 5 can you make? **5 groups of 5**

30 cubes will make 7 towers of 5.

True or false?

Explain your answer.

False.

30 cubes will make 6 towers of 5 as $30 \div 5 = 6$ (not 7).

Dom built a number of towers that are 5 cubes high.

The amount of cubes I started with was between 40 and 60.

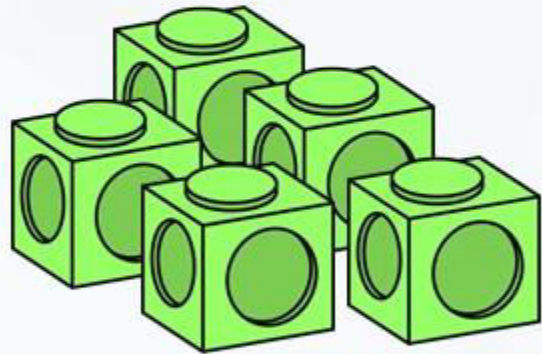

How many towers could Dom have built?

List all possible answers.

9, 10 or 11 towers.

Take 20 cubes.

How many towers of 5 can you make?

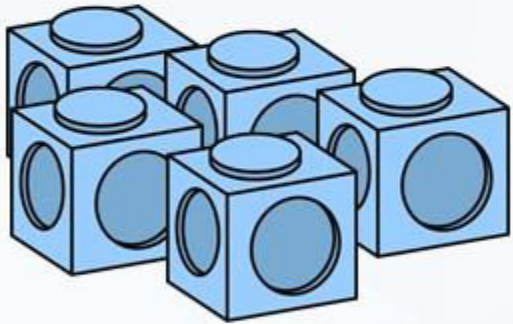

You can make 4 towers of 5.

4 towers of 5 is the same as 20.

20 is the same as 4 towers of 5.

Take 30 cubes.

How many towers of 5 can you make?

You can make 6 towers of 5.

6 towers of 5 is the same as 30.

30 is the same as 6 towers of 5.

How many towers of 5 can you make from 45 cubes?

You can make 9 towers of 5.

9 towers of 5 is the same as 45.

45 is the same as 9 towers of 5.

15 apples are shared between 5 horses.

How many apples will each horse get? 3

$$\boxed{15} \div \boxed{5} = \boxed{3}$$

50 pencils are shared between 5 children.

How many pencils will each child get? 10

$$\boxed{50} \div \boxed{5} = \boxed{10}$$

Group the 1p coins into 5s.

How many groups of 5 do we need to make 15p?

3 groups of 5 1ps = 15 x 1p coins.

3 groups of 5p = 15p.

15p = 3 x 5p.

15p ÷ 5p = 3.

Group the 1p coins into 5s.

How many groups of 5 do we need to make 25p?

5 groups of 5 1ps = 25 x 1p coins.

5 groups of 5p = 25p.

25p = 5 x 5p.

25p ÷ 5p = 5.

Spot the mistake.

$$\div 5 = 12$$

Explain how you know.

$50 \div 5 = 10$ (not 12).

My number is greater between 10 and 40.
I have 5 equal groups.

What number could Ben have started with and how many would be in each group?

Start with $35 \div 5 = 7$ in each group.

Start with $30 \div 5 = 6$ in each group.

Start with $25 \div 5 = 5$ in each group.

Start with $20 \div 5 = 4$ in each group.

Start with $15 \div 5 = 3$ in each group.

Thursday/ Friday Short Lesson 3

Step: Divide by 10

How many 10s in 30?

$$\textcircled{10} \textcircled{10} \textcircled{10} \div 10 = \boxed{3}$$

$$\underline{30} \div \underline{10} = \underline{3}$$

There are 3 tens in 30.

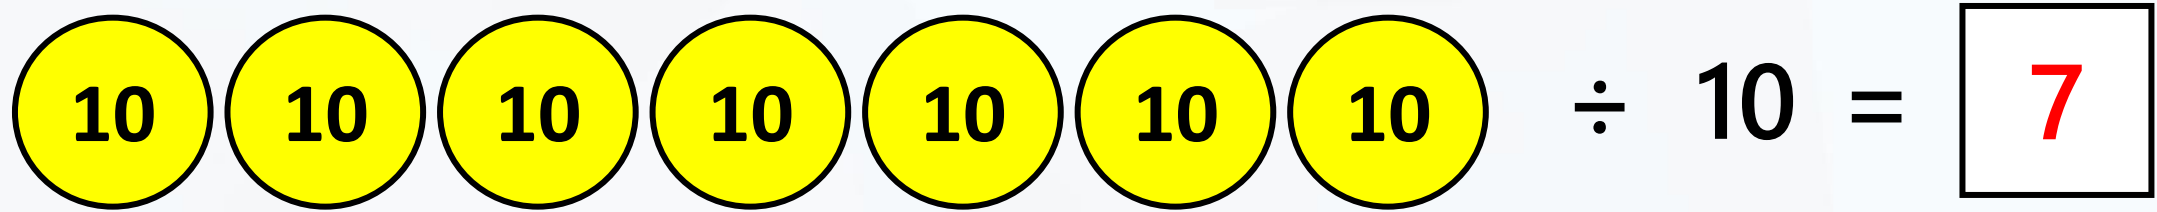

How many 10s in 60?

$$10 + 10 + 10 + 10 + 10 + 10 \div 10 = 6$$

$$\underline{60} \div \underline{10} = \underline{6}$$

There are 6 tens in 60.

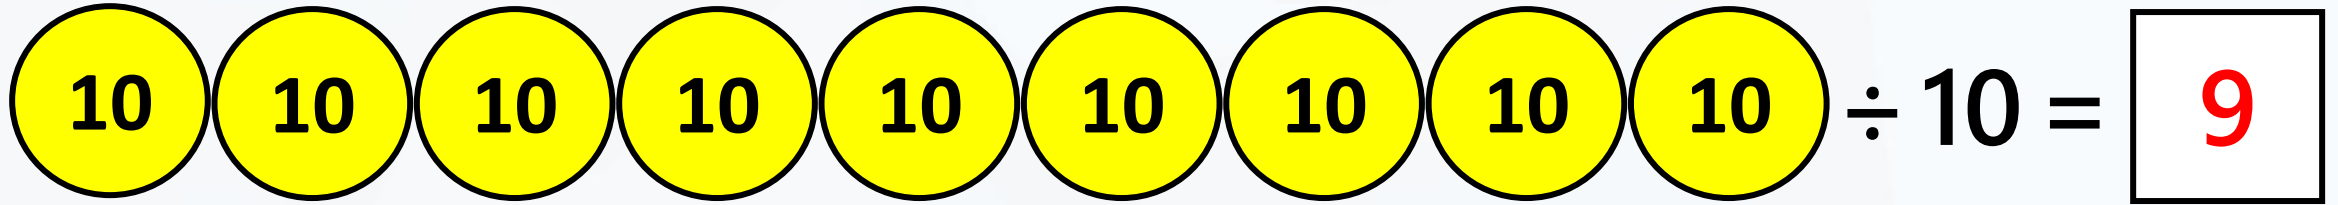

How many 10s in 70?

$$10 \ 10 \ 10 \ 10 \ 10 \ 10 \ 10 \div 10 = 7$$

$$\underline{70} \div \underline{10} = \underline{7}$$

There are 7 tens in 70.

How many 10s in 90?

$$10 + 10 + 10 + 10 + 10 + 10 + 10 + 10 + 10 \div 10 = 9$$

$$\underline{90} \div \underline{10} = \underline{9}$$

There are 9 tens in 90.

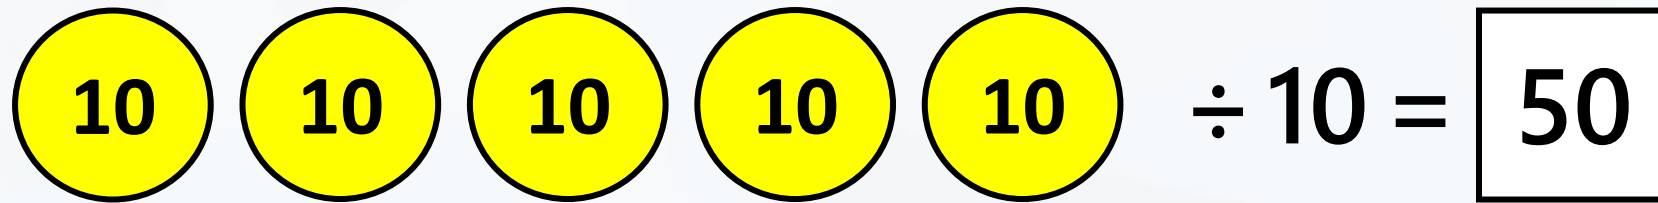

How many 10s in 40?

$$\textcircled{10} \textcircled{10} \textcircled{10} \textcircled{10} \div 10 = \boxed{4}$$

$$\underline{40} \div \underline{10} = \underline{4}$$

There are 4 tens in 40.

This representation shows there are 5 tens in 50.

$$\textcircled{10} \textcircled{10} \textcircled{10} \textcircled{10} \textcircled{10} \div 10 = \boxed{50}$$

True or false?

False

The answer should be 5 (not 50).

$50 \div 10 = 5$ tens.

Use the counters below to make division calculations:

$$\underline{\quad} \div 10 = \underline{\quad}$$

How many calculations can you make?

List them.

$$60 \div 10 = 6$$

$$20 \div 10 = 2$$

$$50 \div 10 = 5$$

$$10 \div 10 = 1$$

$$40 \div 10 = 4$$

$$0 \div 10 = 0$$

$$30 \div 10 = 3$$

Bananas can be sold in packs of 10.
How many packs can be made?

When 20 bananas are sold in packs of 10, 2 packs of bananas can be made.

20	
10	10

Oranges can be sold in packs of 10
How many packs can be made?

When 30 oranges are sold in packs of 10, 3 packs of
bananas can be made. Complete the bar model.

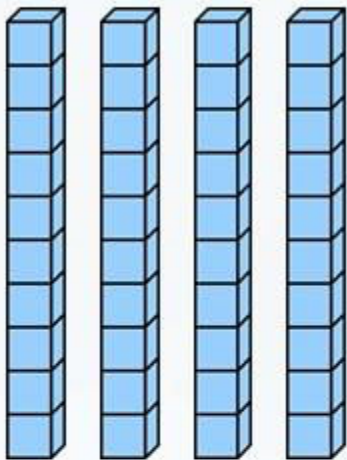

Strawberries can be sold in packs of 10
How many packs can be made?

When 50 strawberries are sold in packs of 10, 5 packs of
bananas can be made. Complete the bar model.

Divide by 10.

$$\div 10 = \boxed{4}$$

$$\div 10 = \boxed{7}$$

Divide by 10.

$$\div 10 = \boxed{6}$$

$$\div 10 = \boxed{10}$$

Use the multiplication calculation to create a division calculation.

$$3 \times 10 = 30$$

$$\boxed{30} \div \boxed{10} = \boxed{3}$$

$$9 \times 10 = 90$$

$$\boxed{90} \div \boxed{10} = \boxed{9}$$

Use the multiplication calculation to create a division calculation.

$$1 \times 10 = 10$$

$$\boxed{10} \div \boxed{1} = \boxed{10}$$

$$10 \times 10 = 100$$

$$\boxed{100} \div \boxed{10} = \boxed{10}$$

Which number sentence is incorrect and how do you know?

- A) $4 \times 10 = 40$
- B) 4 lots of 10 = 40
- C) $40 \div 10 = 4$
- D) Forty \div ten = three

D is incorrect.

Forty divided by ten is 4 (not 3).

How many multiplication and division calculations can you make?

4

10

40

List your calculations.

$$40 \div 10 = 4$$

$$4 \times 10 = 40$$

$$40 \div 4 = 10$$

$$10 \times 4 = 40$$
