

Introduction:

Skipton castle was built in 1090 by a man named Robert de Romille and is over 900 years old. It is the most preserved castle in England. The castle was originally built from wood and earth but this was not strong enough so it was rebuilt using stone. In 1310 King Edward II gave Skipton castle to Robert Clifford.

Inside the castle:

The castle has two floors or rooms, all connected to six large defensive towers. The bedrooms, kitchen and great hall are on the first floor, while the cellar and storage rooms are on the second floor.

SKIPTON CASTLE

What year was Skipton Castle built in?

Who built it?

How many years old is Skipton castle?

What material was used to rebuild the castle?
