

Friday Green Challenge

Two identical bead strings have a total length of 64 cm.

Would the total length of three of these
bead strings be longer or shorter than a metre? _____

Explain how you know.

Here are eight number cards.

Use the number cards to make each calculation correct.

You can use each number once only.

$$\square + \square = 1$$

$$\square + \square + \square = 1$$

$$\square + \square + \square = 1$$
