

### Monday Green Challenge

Scott, Esther and Dani timed how long it took to have a shower.

$$\text{Scott} = \frac{1}{10} \text{ hour} \quad \text{Esther} = 315 \text{ seconds} \quad \text{Dani} = 3 \text{ mins } 27 \text{ secs}$$

How long did it take them in total?

What was the difference between the longest and shortest times?

Brett, Annie, Aisha and Filip are going on holiday.

Here are the total lengths of their journeys.

Brett	12 hours longer than Filip
Annie	$1\frac{1}{4}$ days
Aisha	twice as long as Brett
Filip	360 minutes

Work out how many hours it took each person.

Place them in order from the shortest to the longest journey.
