

Wednesday Green Challenge

Using the digit cards once only each time, show six different times that could be shown on a 12-hour digital clock.

You do not need to use all the cards every time.

Are there any other possible answers?

Keeva's watch shows this time:

- a) Keeva's watch is 17 minutes fast. What is the correct 12-hour digital time? Show how you know.

- b) Isaac's watch is 6 minutes slow. When Keeva's watch shows 3:15 p.m., what time will Isaac's watch show? Show how you know.
