

**Tuesday
Green
Challenge**

An explorer in the Antarctic is recording the positions of several different sea creatures on this coordinate grid. Using the clues, can you find the possible coordinate positions of the sea creatures on the grid? Is there more than one possible answer? Use the sea creature cut-outs to investigate.

Clues	
a) The shrimp's position has the same number for both its x-axis and its y-axis coordinate.	b) The porpoise's position is on the x-axis and its y-axis coordinate is 0.
